SUMMARY

Software engineer with professional experience in **PHP-based applications** and a strong foundation in **modern JavaScript frameworks**. Actively developing full-stack expertise using **MENN and MERN** through hands-on projects and university coursework, with a focus on building scalable, maintainable software solutions.

PROFESSIONAL EXPERIENCE

CoreDigitals, *Php Developer | Frontend Developer*

05/2025 – 11/2025 | karachi

- Developed dynamic websites, CRMs, and brand landing pages using **PHP, phpMyAdmin, AJAX, jQuery, HTML, and CSS**.
- Implemented form handling, database operations, and asynchronous data flow for real-world client projects.
- Deployed and managed projects on **InfinityFree**, ensuring hosting stability and performance.

Ayan Tech, *Website Developer | Frontend Developer*

08/2023 – 07/2024 | karachi

- Built responsive websites using **HTML, CSS, JavaScript, React.js, Bootstrap, Material UI**, and **media queries**, converting designs into functional web pages.
- Improved layout consistency, responsiveness, and cross-device compatibility across client websites.

PROJECTS

Wearify (FYP), *In Progress* 

10/2025 – Present

A virtual try-on system using MENN concepts and Python-based processing.

Tech: MENN, Python, vercel, render

- Focused on virtual clothing visualization and backend logic. Research-driven final year project aligned with MENN stack direction

SquadSecurity 

12/2025 – 01/2026

A security services platform for managing company services and client engagement.

Tech: Next.js, ShadCN UI, Vercel

- Built a modern, scalable frontend using Next.js and component-based architecture with ShadCN and responsive layouts. Deployed preview builds on Vercel with CI-ready structure.

Hire Hunt 

A recruitment platform enabling HRs to post jobs and applicants to browse and apply. 

Tech  : PHP, jQuery, HTML, CSS

- Developed job posting, listing, and application workflows. Implemented dynamic frontend behavior using jQuery and AJAX. Designed database-backed features for user and job management.

Hungrify, *University Projects*

Tech: MongoDB Atlas, Express.js, React.js, Node.js

- Built full-stack university projects following MERN architecture. Implemented authentication, CRUD operations, APIs. Projects maintained on GitHub to demonstrate MERN proficiency.

Bookify 

A book brand website showcasing services, portfolio, and inquiry forms. 

Tech  : PHP, MySQL, jQuery, HTML, CSS

- Created interactive forms connected to MySQL database. Built service and portfolio sections with clean, user-friendly design. Focused on branding and content presentation.

Smart Shuttle Service, *University Project*

Tech: Flask, React.js, Maria DB, AWS, Material UI

- A full-stack web application for managing university shuttle services, including students, drivers, and admin operations, with database-driven workflows and a responsive user interface.

EDUCATION

Bachelors of Computer Science, *IQRA UNIVERSITY (Gulshan Campus)*

2022 – Present | karachi

- GPA : 3.16

• **Coursework** : Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Web Development

TECHNOLOGIES

Skills:

- PHP, JavaScript, Next.js, React.js, jQuery, Node.js, Express.js, Python

Technologies & Tools:

- MongoDB, MySQL, MariaDB, phpMyAdmin, Vercel, render, Railway, Firebase Hosting, InfinityFree, Apache, Material UI, ShadCN UI, Tailwind, GitHub, Postman, REST API's, Cursor, VS Code
